Overview

Vi-Link HD SDI Video equipment: The DL400 is a fiber optic digital multiplexer that designed to transmit up to 4 channels of high quality uncompressed digital 3G HD SDI video signals over one single mode cable. It is a cost effective selection for transporting high quality SDI camera pictures from the remote location to the operation center via long fiber optic cable.

The DL400 is compatible with all SMPTE rates: SMPTE259M SDI from 143 to 360 Mbps, SMPTE344M 540Mbps, SMPTE292M HD-SDI 1.485 Gbps, SMPTE372M Dual Link HD-SDI 2.97 Gbps, SMPTE424M Dual Speed 3G-SDI 2.97 Gbps.

The DL400 offers a fully serial digital video encoding/decoding of real time high quality digital video providing adjustment free operation over a wide operational range. Using automatic gain control and state-of-the-art multiplexing, combining with CWDM technologies for distances from back-to-back to 50 Kilometers, our digital signaling offers superior receiver output stability, which is unaffected by changes in fiber path attenuation due to aging or splicing points.

The extended temperature capability of the DL400 satisfies very critical applications requiring high quality video performance with high reliability.
